● Common problems and solutions

1. Please check whether the power adapter cable joint is normal and integral. We suggest to use only qualified, branded power adaptors and cables for charging the PB.
2. If the power supply capacity is too low, please recharge. Remember to always check the device that needs to be charged battery, for compliance with the PB.
3. If not charging, please check the connector plug for any objects that may have got into it (dust, etc)
4. If the PB was not used for a long period of time (more than 2 months) please recharge before use.

● Warning Notes

1. If long time passes without charging, please recharge (it needs to be recharged at least once every 6 months).
2. While being uses, the PB may heat up to 40 degrees Celsius. This is a normal phenomenon, not a failure of the device.
3. Please keep the device in a dry environment, fully dried, away from sunlight and do not wash with water or any abundant liquids. (Use only a moist, soft cloth)
4. Take good care of the environment: The PB must be disposed of according to the designated places for recycling that authorities have installed

⚠ Important note

1. Do not let children play with the PB. They can handle it only with responsible, safe supervision from adults, and under the adult's guidance.
2. Do not break, tear apart, throw in fire. Do not use collisions to another hard material to remove the fitting or the wading. This may short-circuit the device and may cause failures, or even worse, fires or accidents.
