

TELLUR SEDNA

User guide

Thank you for choosing a Tellur product. The Sedna Bluetooth earphones has a trendy design and high compatibility - giving you hands-free convenience for making calls and listening to music. It's an excellent office, travel and in-car option.

Connected devices

1. As soon as you take out "Sedna Bluetooth Earphones" from the charging box, both earphones will power on automatically and you will hear a voice prompts "Power on". The L&R earphones pair each other automatically and you will hear a voice prompts "Connected", "Left channel/Right channel". When pairing the main device's (L) led indicator flashes blue and white while the sub-device's led indicator flashes only blue for 7 seconds.
(For the first time, connecting both earphone takes about 15-20 seconds)

2. When you hear the voice prompts "Pairing", it means both earphones started connecting with the mobile phone. Activate your cell phone Bluetooth and search "Sedna". Enter connection password "0000", a voice prompts "Pairing successful", "Second device connected", it means both earphone connected to the mobile phone successfully. After paired, both earphones' led indicators flash blue color for 7 seconds.
3. Start enjoying music after you finished the above steps.

Operations

1. Both of L&R earphones have only one button, while playing music, press the button on any earphone to play/pause music; press twice to play next song; press three times to play previous song. Hold the button on left earphone for one second to turn on/off the mobile phone's voice assistant when earphones are in standby mode.

2. If receiving a phone call while playing music, it pauses automatically and left earphone announces the calling's phone number. Press the button on left earphone to answer the phone call. Press twice the button to reject the incoming phone call.
While talking, press the button on left earphone to end phone call. Press twice the button to switch to mobile phone mode.

3. Power off: Press long the button on any earphone (the other one will power off automatically). If you don't put the earphones into the charging box, next time you want to use the earphone you should manually power by pressing both earphone at the same time.

Reconnection (last memory)

1. When you take out the device from the charging box and the mobile phone Bluetooth is activated, they reconnect automatically. If only the left earphone is powered on (master device), it reconnects automatically. If only the right earphone is powered on (sub-device), led indicator flashes blue & white color and switches to pairing mode.

Charging status display

1. As soon as you put the earphones into the charging box, they will power off automatically and start charging. (playing music stops automatically)

2

2. Blue LED indicator on the charging box displays power status while recharging:
 - 0% - 25% power: flashes once every 2 seconds
 - 25% - 50% power: flashes twice every 2 seconds
 - 50% - 75% power: flashes 3 times every 2 seconds
 - 75% - 100% power: flashes 4 times every 2 seconds
3. White LED indicators on earphones lights on when it is charging by the charging box; and off when fully charged.
4. When taking out the earphones from the charging box, the blue LED indicator on the charging box flashes only once, it means the charging box is low power and cannot recharge the earphone, please recharge the charging box as soon as possible.
